

Appendix VI. Spill Response Companies

This list was prepared by the Maryland Department of the Environment from information known and available at the time of preparation. The Department makes no claim as to its completeness or the quality of work performed. Inclusion on this list is not to be considered an endorsement by the State of Maryland. The Department strongly recommends that the consumer obtain prices and review company references before entering into agreements with any contractors or service providers. There are two categories of contractors:

- **Underground Oil Spills/Full Service:** These contractors specialize in monitoring and removing underground oil spills. All oil spill contractors may be able to provide service in controlling an underground oil spill. Most standard well drilling companies are capable of installing observation wells as per the Oil Control Program's requirements.
- **Surface Oil Spills/Full Service:** These contractors have all the necessary equipment for containment, control, and removal of surface oil spills.

3D Environmental, LLC

702-D Naylor Mill Road
Salisbury MD 21801
410-742-4322 or 443-497-0153
