

## Queen Anne's County — Upper Corsica River

### What was requested?

The department received a request to establish a new speed zone in the area from Centreville Landing (wharf) downstream to Sycamore Point. The request is for the speed limit in the area to be 6 knots at all times during the year.

### What is the current regulation for the area?

There is not a regulation in this area. This is a request for a new area.

### Why was this change requested?

*The requestor stated:*

- 1) Safety concerns. The requested area is a narrow stretch which can get very busy. Piers jut into the river from either side leaving little space for boats to safely pass one another. There is also an increased number of paddlers who launch from the landing and use this stretch of the river.
- 2) Erosion concerns. The shoreline along this stretch is highly subject to erosion. The DNR/local Corsica Restoration Project has been trying to restore shorelines in this area for the past 15 years. Wave action from boats continues to be a threat to healthy shorelines in this area.

### Maps of the Area

[https://dnr.maryland.gov/boating/Documents/regulations/BAAC-Upper%20Corsica%20River\\_2021.pdf](https://dnr.maryland.gov/boating/Documents/regulations/BAAC-Upper%20Corsica%20River_2021.pdf)

### Who could this affect?

- All types of boating activities occur in this area; therefore, it could affect all waterway users (recreational and commercial), business owners in the area, and property owners in the area.
- There is one county boat ramp and landing.
- The piers at the beginning of the speed zone could be effected by the wake action from boats slowing down and speeding up.

### Has this change been discussed with advisory bodies?

The department and the Boat Act Advisory Committee (BAAC) are gathering information and will meet in September to fully discuss and [evaluate](#) the request. Please [join our mailing list](#) to be notified when this request will be evaluated by the BAAC.

### When will this be effective?

This change could be effective in 2022, however, at this time, the department cannot determine if the change will be adopted nor the exact date that it could be effective. The department will follow our normal scoping and proposal procedure. The goal of scoping is to identify issues, potential impacts, and reasonable alternatives associated with the issues so that management actions can be developed.

After the public has had an opportunity to comment on possible management actions during the scoping process, the department considers these comments and develops an appropriate management strategy.

If the action is necessary and appropriate, the rules will be promulgated following the Administrative Procedures Act described in Title 10, Subtitle 1 of the State Government Article Annotated Code of Maryland.

- The General Assembly's Administrative, Executive, and Legislative Review Committee reviews the regulatory proposal for fiscal and legal analysis.
- The proposal is printed by the Division of State Documents in the Maryland Register.
- A 30-day public comment period begins on the day of publication.
- After review of the comments, the department may adopt the changes.
- If the department adopts the changes, they become effective after a notice is published in the Maryland Register that announces approval and the effective date.

### **Notes Regarding This Summary**

This summary is prepared in accordance with the requirements of State Government Article, §10-110, Annotated Code of Maryland. It is intended to help you understand the potential or revised rules. This summary is not intended to replace or supersede these rules, but to facilitate understanding and compliance with the rules. The department will clarify or update the text of the summary as the idea moves through the regulatory process.
