I. Introduction and National Shellfish Sanitation Program Harvester Training Materials

II. Section 1: State of Maryland Shellfish Closure Maps as of June 1, 2022.

The first page of section 1 has the master chart which shows where detail maps are available. Numbered blocks show which detailed maps are included in this book, along with their page numbers.

III. Section 2: Maryland Department of the Environment (MDE) Closed Areas “Detailed Descriptions of MDE’s Shellfish Growing Water Classifications as of June 1, 2022”

The MDE closure areas in this book are labeled with a code, a number followed by a letter, 25A for example, that identify MDE shellfish growing water classifications. To find the matching description go to section 2, find the code number on the left hand side and then under that entry, find the description matching the letter from the code.

Additional restrictions for waters lying adjacent to marina facilities are described at the end of this section.

IV. Section 3: Coordinates for the Maryland Department of Natural Resources Shellfish Closure Areas as of June 1, 2022.

The DNR Shellfish Closure areas are listed by tributary and site name. Each entry has the coordinates for the corners of the closure area.

Introduction

Maryland Department of Natural Resources Shellfish Closures

The Maryland DNR is required to provide a licensee with a publication of the maps and coordinates of oyster sanctuaries, harvest reserve areas, and areas closed to shellfish harvest by the Department of the Environment when the licensee pays for the oyster surcharge. The licensee must certify that they have received this publication.

The DNR Shellfish closures depicted in this book fall into two categories: Sanctuaries and Reserves. Sanctuaries are areas which are closed to shellfish harvest and often contain oyster restoration projects to help enhance oyster populations for their environmental benefits. These areas are permanent closures. Reserves are areas which are enhanced, then opened for periodic harvest when certain criteria are met.

Shellfish aquaculture leases are not depicted on the shellfish closure area maps contained in this book. The areas on these maps may contain private shellfish leases that are not open to the public fishery. Shellfish leases are required to be marked and it is illegal to take shellfish from a privately leased area. An online map of active leases is available on the Department's website at: <http://dnrweb.dnr.state.md.us/fisheries/aquatool/aquatool.asp>. For verification of active lease locations, harvesters may also contact the Department's Aquaculture Division at 410-260-8648.

In addition to the areas described in this publication, a number of areas in State waters are off-limits to certain shellfish harvesting gear. For instance, power dredges may only be used to harvest wild oysters in specific areas and certain areas are closed to hydraulic clam dredging. Licensed shellfish harvesters are responsible for knowing all applicable shellfish laws and are strongly encouraged to contact the Department's Hydrographic Engineering Unit at 410-643-6521 for detailed charts describing additional restrictions not contained in this book. It is not safe to assume that an area is open to harvest if the area is not marked.

Special Reminder to Clammers: Under COMAR 08.02.02.12 and 08.02.07.03, a person may not harvest clams within 150 feet of a: (1) Natural oyster bar; (2) Leased area; (3) Public shellfish fishery area established in COMAR 08.02.04.17A; or (4) Sanctuary designated in Section I of "Oyster Sanctuaries of the Chesapeake Bay and Its Tidal Tributaries (September 2010)" that is incorporated by reference in COMAR 08.02.04.15A and reproduced in the back of this book.

Special Reminder to Skipjack (dredge boat) operators: The definitions of dredge and dredge boat according to Natural Resources Article, Section 4-1001, Annotated Code of Maryland are: "Dredge" includes any dredge, scoop, scrape, or similar device used in catching oysters or clams by dragging. Dredge boat. "Dredge boat" means any sailboat which does not have a screw, propeller, engine, turbine, or other device for self-propulsion, used in catching oysters or clams by dredge." The definition of "sailing vessel" in Rule 3 of the Navigation Rules for International and Inland Waters is "any vessel under sail provided that propelling machinery, if fitted, is not being used." There are also additional requirements for dredge boats using an auxiliary yawl found at Natural Resources Article, Section 4-1013, Annotated Code of Maryland.

Violations of shellfish laws may result in a criminal conviction, fine and/or a suspension or revocation of your tidal fish license by a Court or the Department of Natural Resources. You may view the Natural Resource Fine Schedule at: <http://www.courts.state.md.us/district/forms/finesch/dnr.pdf> (the District Courts of Maryland updates this document every October 1st). You may view commercial harvesting penalties under Code of Maryland Regulations 08.02.13.02 and 08.02.13.03. You may view specific violations which may result in immediate oyster authorization revocation proceedings under Natural Resources Article, Section 4-1210, Annotated Code of Maryland.

Introduction

Maryland Department of the Environment Closed Areas

In conformity with the Annotated Code of Maryland, Natural Resources Article, Section 4-742, the maps in this publication summarize the Maryland Department of the Environment’s (MDE) classification status of oyster & clam harvesting waters as of June 1, 2022. As required under Annotated Code of Maryland, Natural Resources Article, Section 4-1006.2 the maps also specifically depict the status of MDE closed areas as of June 1, 2022. For the most current status information visit MDE’s web site www.mde.state.md.us or contact MDE’s Water and Science Administration at (410) 537-3818.

The MDE provides an interactive map that includes layers of science-based information, with interactive pop-up windows, and includes the latest MDE closure lines, station sampling data, NOAA rainfall data, and DNR sanctuary layers. This map is accessible at: <https://mdewin64.mde.state.md.us/WSA/Shellfish/index.html>. This resource is optimized for mobile devices, and can be opened on a web browser and includes a widget that allows users to zoom to their exact location on the map with the press of a button while on the water.

The maps generally depict the classification of shellfish waters of the State: restricted, conditionally approved, or approved. Detailed descriptions, including the map coordinates for all classifications can be found in Section 2 of this publication. Restricted means that no direct harvesting of oysters and clams is allowed at any time with the exception of private leases and/or aquaculture by request for the purpose of natural cleansing (relay). Request for relay of oysters or clams from restricted waters to approved waters must be made in writing to MDE in advance of possible relay dates, and can occur only outside of oyster season and when water temperatures are above 50°F. Conditionally approved means that oysters and clams can be directly harvested except for the three days following a rainfall of an inch or greater in twenty-four hours. Harvesters are notified of conditional closings daily by an announcement broadcast by the Maryland Natural Resources Police made at 5, 6, and 7 a.m. on VHF radio band 14, by calling toll free 1-800-541-1210, or by visiting MDE’s web site daily advisory on conditionally approved shellfish areas at <https://mde.maryland.gov/programs/marylander/fishandshellfish/Pages/shellfishadvisory.aspx> Approved means oysters and clams may be harvested any time that is consistent with the Department of Natural Resources harvesting regulations. Prohibited waters include water where shellfish may not be legally taken because of the high potential for contamination. In addition, near- shore areas (shallow waters up to approximately 200 feet from shore) may appear as approved on the map because of inadequate resolution; however, these waters may be unsuitable for harvesting until they are monitored and classified. Interested persons should contact MDE to determine the classification of all near-shore waters.

Maryland is a member state of the National Shellfish Sanitation Program (NSSP), which is a federal/state cooperative program recognized by the U. S. Food and Drug Administration (FDA) and the Interstate Shellfish Sanitation Conference (ISSC) for the sanitary control of shellfish produced and sold for human consumption. MDE uses the bacteriological standards as set forth in the NSSP for shellfish harvesting area classifications based on bacteriological water quality and sanitary survey. In addition to shoreline surveys that assess potential and actual pollution sources and risk, the bacteriological fecal coliform standards that must be met for each classification are listed below:

| NSSP Classification | Fecal Coliform Standard |
|---|--|
| Approved/Conditionally Approved (direct harvest permitted) | Median ≤ 14 MPN/ 100ml 90 th Percentile <49 |
| Restricted (relay required) | Median ≤ 88 MPN/ 100ml 90 th Percentile <300 |
| Prohibited (no harvest permitted) | Median > 88 MPN/ 100 ml 90 th Percentile > 300 |

Marylanders' Guide to Skin Wounds and Water Contact

Vibrio are bacteria that naturally occur in brackish water like the Chesapeake Bay and its tributaries, and in salt water, especially during warm weather months.

Vibrio infections are rare. However, when *Vibrio* comes into contact with an open wound, it can cause serious infections characterized by unusual redness, swelling and drainage.

This can be particularly dangerous for people with weakened immune systems.

PROTECT YOURSELF AGAINST *VIBRIO*

- Avoid water contact if you have any skin wounds.
- If water contact cannot be avoided, cover wounds with water-proof bandages.
- Clean wounds immediately with soap and clean water after contact. If soap and clean water are not available, clean the wound with hand sanitizer then wash as soon as possible.
- Wear water shoes to avoid cuts and scrapes.
- Wear gloves and use extra care when handling crab pots or other equipment.
- Always shower after swimming in natural waters and wash hands before handling food or eating.

If you develop a wound with unusual redness, swelling or drainage, SEEK MEDICAL ATTENTION IMMEDIATELY and let your healthcare provider know if you came in contact with brackish or salt water.

Commercial Shellfish Aquaculture Lease Coordinate Information

The areas on the maps may contain private shellfish leases that are not open to the public fishery. Commercial shellfish aquaculture leases are not depicted on the shellfish closure area maps contained in this book. It is a shellfish harvester's responsibility to be aware of the location of shellfish leases prior to harvesting.

While Maryland law and regulation require that a minimum of four corners of each lease be marked, there are cases where markers may have been moved or lost. In an effort to assist commercial licensees with knowing the location of shellfish aquaculture leases prior to harvesting, the Department has created an online tool.

You can access the online tool here:

http://dnr.maryland.gov/fisheries/Pages/aquaculture/information_portal.aspx

The mapping tool displays each lease and the corner coordinates associated with the lease. Latitude and longitude coordinates are represented in a degrees minutes seconds format. It may be necessary to convert the coordinates into a different format before entering the information into your GPS unit or change settings on your GPS unit to match this format.

Please note: leases are issued on a continuous basis throughout the commercial oyster season and these leases may not be immediately available to be viewed using the online tool. However, a list of leases that have been issued since the beginning of the season will be maintained on the site listed above in chronological order. Each listing will be accompanied by a map that includes the coordinates for that lease. **If you have questions about the location or status of a shellfish aquaculture lease** or to request a print version of lease coordinates, **please contact the Aquaculture and Industry Enhancement Division at (410) 260-8648.**

It is a shellfish harvester's responsibility to be aware of the location of these leases. Violations of shellfish laws may result in criminal conviction, fine and/or a suspension or revocation of your tidal fish license by a Court or the Department of Natural Resources. Harvesting oysters from a leased area by a person other than the leaseholder or the leaseholder's official designee is illegal and may result in immediate oyster authorization revocation proceedings under Natural Resources Article, Section 4-1210, Annotated Code of Maryland. Thank you for your cooperation.

**Information for Maryland Shellfish Harvesters:
Reducing the Risk of *Vibrio* Illness**

2022 - 2023

Maryland Department of Natural Resources
Shellfish Program

Introduction

- Many consumers prefer eating whole, raw oysters. There may be nothing wrong with the oyster, but if eaten raw or if the product is not handled properly, there is a possibility of some consumers becoming ill.
- The risk of *Vibrio* illness can be greatly reduced through appropriate harvesting, handling, and transportation of oysters intended for raw consumption.
- This presentation outlines practices used to minimize the growth of *Vibrio* bacteria and follows the shellfish product through harvesting, handling, transportation, and market.
- The term “shellfish” in this presentation means oysters and clams for human consumption.
- The most important steps begin with you, the harvester.

Harvesting and the closure areas book

- Shellfish filter many particles from the surrounding water they live in.
- Unfortunately some things in the water, like bacteria and viruses, can be harmful.
- Location is one of the most important things a harvester controls.
- When you pay your oyster surcharge and when you declare your intent to clam, you will receive a book with maps of closed areas: **Sanctuaries, Reserves, Restricted Areas, and Conditionally Approved Areas.**

- You are there to protect the quality and safety of your shellfish product.

Federal Tagging Requirements

- Filling out the bushel tags, buy ticket, and harvest report completely are very important for traceability. Tags contain critical information: who, what, where, and when.
- In the event of an illness, MDH and partners will need this information to determine if there is a problem at the source. False or incomplete information jeopardizes the process and puts the industry at risk. Maryland's reputation as a reliable source of safe shellfish depends on the cooperation of harvesters and dealers.
- Each harvester shall complete and affix a tag to each bushel of oysters which shall be in place before leaving the harvest area and while the oysters are being transported to a certified dealer.

- Tags may be purchased at one of the DNR service centers.

- If you choose to get your own tags made, guidelines and an example are on the DNR website:

<https://dnr.maryland.gov/fisheries/Documents/RevisedOysterTaggingReg.pdf>

Tagging Requirements – On the Water & At the Dealer

- On the water, prior to leaving the oyster bar, oysters must be in a proper container (orange basket, clam crate, or standard MD tub).
- Each bushel must be tagged at the location of harvest and the harvesters license #, date (with year), bar name, and harvest area (NOAA code) must be recorded on the tag by the harvester in permanent marker or ink.

- Each tag must stay attached to each bushel until transported to the certified dealer where the tag can be removed if repackaged and retagged with a MDH-approved dealer tag.
- The dealer must keep each harvester tag for 90 days in an orderly manner so they can be recovered in the event of an illness.

The buy ticket is completed and signed by the buyer and the harvester.

Buy Ticket

If a harvester sells directly to consumer - they must complete a buy ticket as both the harvester and the dealer. Also serves as harvester's receipt.

The buy ticket number goes on harvest report.

Harvest Report

Handling

- Proper shellfish handling involves: **vessel condition, sanitation, handling, and transportation.**
- Vessels that help promote shellfish safety and quality have decks that prevent shellfish from contacting bilge water and other contaminants like fuel or hydraulic oil. They have shading to protect product from the sun.
- Sanitation devices must be placed on board the vessel to help protect water quality in the harvest area and the shellfish product. A bucket with a tight-fitting lid labeled “human waste” in contrasting letters at least three inches in height is an example of a satisfactory sanitation device. No animals are to be on board.

It is critical that human sewage or other bodily fluids are not discharged overboard while boats are in growing areas or in no discharge zones. The industry depends on you. Failure to have a marked human waste container on board your harvest vessel may result in receiving a citation from the Natural Resources Police.

A harvester's responsibility continues through transport & unloading

A harvester is responsible for:

1. How time and temperature affect the harvested shellfish
2. Minimizing exposure of shellfish to heat and weather
3. Selecting a licensed and certified dealer with a record of proper shellfish handling, transportation, and storage

• Bacteria, such as *Vibrio*, are in shellfish harvested from open waters. When oysters are left too long in warm temperatures, these bacteria increase and could cause harm to consumers.

• Compare it to forgetting to put the milk back in the refrigerator. Given enough time left out at a warm temperature, the milk contains bacteria which will multiply and turn the milk sour.

- Harvested shellfish should be shaded on the harvest vessel and throughout transportation and handling whenever possible.
- Remember, a protected product equals a safe product!

Trucking

- Once you get your shellfish to shore, you are responsible for protecting the product while it is delivered to the dealer.
- Harvesters must use only DNR-approved containers (COMAR 08.02.04.04) and deliver the shellfish directly and immediately to a certified dealer and avoid making stops along the way.
- Shellfish must be protected from exposure to gasoline, grease or garbage and no animals should be present.
- Harvesters should have shellfish, especially oysters, to the dealer to begin cooling as quickly as possible, but no longer than 18 hours after the first shellfish is first removed from the water.
- Dealers need to ensure shellfish are kept at a temperature of 45°F or below and above freezing.

Selling Oysters....

In Maryland, a **licensed shellfish harvester** (Unlimited Tidal Fish, Oyster Harvester, Oyster Dredge Boat, or Clam Harvester) **selling oysters or clams for human consumption on the retail market or to private individuals, must have a Maryland DNR Tidal Fish Dealer License AND a Shellfish Certification from the Maryland Department of Health (MDH)**. To apply for a MDH Shellfish Certification or to get more information, please contact Kim Coulbourne at:443-690-3106 or kim.coulbourne@maryland.gov

- **Licensed shellfish harvesters without a Shellfish Certification from MDH, must sell oysters and clams for human consumption on the day of harvest to a dealer who possesses both a DNR Tidal Fish Dealer License AND a MDH Shellfish Certification.**

- To see who is a certified shellfish shipper, see the Interstate Certified Shellfish Shippers List (ICSSL) online: <https://www.cfsanappsexternal.fda.gov/scripts/shellfish/sh/shippers.cfm?country=US&state=MD>

Conclusion

- **This page is a record of your completed training for the 2022-2023 license year.**
- Remember, keep shellfish clean and cool, attach and fill out tags completely, and get them to a certified dealer as soon as practical.
- The most important step begins with you, the harvester. You will be the first line of defense protecting shellfish safety and quality.
- The following three pages describe how you can look up Maryland oyster regulations and laws online as well as information on water quality in shellfish growing areas, closures, and a link to the National Shellfish Sanitation Program webpage.

June 2022

Dear Commercial Shellfisherman:

You will be receiving a harvester reporting packet in the mail. The packet will include reporting instructions, an example report, and labels for each monthly report for the 2022-2023 oyster and clam seasons. The reporting requirement described below is in addition to dealer reporting.

1. Reporting is **MANDATORY** and a report must be submitted for each month of the season, even if you did not catch oysters or clams. If you did not catch oysters or clams, you must indicate that on your signed form, write in the month you are reporting for, and leave the rest of the questions blank.
2. Please **write the month** you are reporting for. Record the **date, number of bushels harvested, gear type, oyster bar where the oysters were caught (or clam area), number of crew in addition to yourself, number of hours spent harvesting, to whom sold, the buy ticket number (for oysters and food clams), and the port or creek of landing DAILY**. Every column should be filled in for each date.
3. Attach the label you received in the mail with your commercial **license number** and **your name**, and **sign each month's report** in the space provided.
4. **Each person who catches oysters and clams must completely fill out the reporting form each month** regardless of how many people fish on each vessel. **If more than one harvester is on the vessel, each person should report their part of the harvest separately.**
5. **Failure to report promptly, accurately, and completely may result in penalties. Incomplete reports will not be accepted.**

Extra catch forms can be found online: <https://dnr.maryland.gov/fisheries/Pages/commercial-reporting.aspx>

Please call Frank Marengi at 410-260-8302 if we can be of assistance.

For questions about late reports, please call the Commercial Reports Hotline: 1-800-893-2722

IMPORTANT REMINDER: Human sewage shall not be discharged overboard from a vessel used in the harvesting of shellfish. Each vessel used for harvesting shellfish must contain an approved marine sanitation device (MSD), portable toilet or other sewage disposal receptacle (example: labeled bucket with a tight-fitting lid) to contain human sewage. The receptacle must be secured on board to prevent contamination of the shellfish, emptied into an approved sewage disposal system and cleaned before being returned to the boat. This is a ticketable offense and will be enforced by Natural Resources Police for the safety of both the public and the industry.

Did You Know?

A shellfish dealer has to be licensed by both Maryland DNR and the Maryland Department of Health (MDH) in order to buy or sell oysters or clams for human consumption. A DNR licensed harvester (TFL, OYH, or ODB) without the MDH license can only sell to a seafood dealer with a MDH Shellfish Certification and a DNR Tidal Fish Dealer's License. Oysters may only be sold to dealers that are certified by MDH. This rule is in MDH and DNR regulation and will be enforced by Natural Resources Police for the safety of both the public and the industry. If a waterman does not want to sell to a dealer that is licensed by both DNR and MDH, then he or she has to obtain a Shellfish Certification from MDH. To get more information or to apply for a MDH Shellfish Certification, please call: 410-767-8400.

June 2022

Standard Oyster Container and Harvester Tagging Requirements

Standard Containers

The following standard containers have been approved for use by the Department for oysters:

- 1) A metal oyster tub that does not exceed the following inside dimensions: 18 inches top diameter; 16 ½ inches bottom diameter; and 12 inches height; this is commonly referred to as the “1 bushel Maryland tub.”
- 2) A round container that does not exceed the following inside dimensions: 16 ½ inches top diameter, 13 ½ inches bottom diameter; and 14 ¼ inches height; this is commonly referred to as the “orange basket;”
- 3) A rectangular shaped container that does not exceed the following inside dimensions: 12 ⅝ inches width across the top, 12 inches width across the bottom, 20 inches in length, and 11 ¼ inches height; this is commonly referred to as the “clam crate.”

Tagging

Each licensee who is authorized to engage in the wild oyster harvest must obtain harvester tags. Tags meeting the National Shellfish Sanitation Program standards may be purchased independently or may be available at one of the DNR License and Registration service centers. **Prior to leaving the bar from which the oysters are caught, the harvester shall complete the information on the tag for each bushel of oysters and affix a tag to each bushel on the vessel. Attach each tag securely to each container.** Tags shall stay affixed to the container until the oysters are landed and in the possession of a MDH certified shellfish dealer.

What is there to gain?

- ✓ Build consumer confidence that Maryland shellfish are safe, certified, and healthy.
- ✓ Shellfish tagging is the industry standard nationwide. Maryland must meet this FDA requirement.
- ✓ Standardized containers will help provide consistent market price per volume.
- ✓ More accurate harvest data will lead to more effective management of the oyster fishery.
- ✓ Failing to properly containerize and tag your oysters may result in penalties.

Please call Frank Marengi at 410-260-8302 if we can be of assistance. Thank you for your cooperation.

Buying and Selling Shellfish in Maryland – License and Certification Requirements for Harvesters and Dealers

- In Maryland, a **licensed shellfish harvester** (Unlimited Tidal Fish, Oyster Harvester, Oyster Dredge Boat, or Clam Harvester) **selling oysters or clams for human consumption on the retail market or to private individuals** (i.e., to anyone who does not have a DNR Tidal Fish Dealer License and a MDH Shellfish Certification), **must have a Maryland DNR Tidal Fish Dealer License AND a Shellfish Certification from the Maryland Department of Health (MDH)**. To apply for a MDH Shellfish Certification or to get more information, please contact Kim Coulbourne at: 443-690-3106 or kim.coulbourne@maryland.gov
- Licensed shellfish **harvesters without a Shellfish Certification** from MDH, **must sell oysters and clams for human consumption to a dealer who possesses both a DNR Tidal Fish Dealer License AND a MDH Shellfish Certification**.
- If you have a DNR Tidal Fish Dealer License AND a Shellfish Certification from MDH and are selling your own catch or buying from other harvesters, you are responsible for filling out **shellfish buy tickets** and **tax reports** (available at DNR regional service centers or by calling 410-260-8302), submitting them according to the schedule in the buy ticket book, and paying the **applicable taxes**. These requirements are in addition to your **monthly harvest report**.
- If you are selling **clams for bait**, you must sell to someone who has a DNR Tidal Fish Dealer License if you do not have one yourself. If you have a Tidal Fish Dealer License, you can sell bait clams to whomever you choose.
- What changed? As of July 1, 2013, if you are not selling to a DNR Tidal Fish Licensed Dealer, you need to be a DNR Tidal Fish Licensed Dealer.

Why two licenses?

There are rules from the Food and Drug Administration called the National Shellfish Sanitation Program Model Ordinance that are required for every State that sells shellfish as a food product. This includes the rule that oysters and clams for human consumption may only be sold to dealers that are certified by MDH. This rule is in DNR and MDH regulation and will be enforced by Natural Resources Police for the safety of both the public and the industry. It is in the best interest of the industry to follow these rules and for Maryland to be known as a source of safe, healthy shellfish.

If you still have questions about buying or selling oysters or other shellfish, please call Frank Marengi at the Maryland DNR Shellfish Program at 410-260-8302.

HARVEST AREA MAPS

Please use these codes to fill out the "Harvest Area" on Buy Ticket and Wild Shellfish bushel tag.

Temporary Closures Requested by County Oyster Committees

There are additional areas closed to oyster harvest that are not depicted on the shellfish closure area maps contained in this book. These are temporary closures requested by the various County Oyster Committees. The areas have been marked with buoys. It is a shellfish harvester's responsibility to be aware of these and all closed areas prior to harvesting. Violations of shellfish laws may result in criminal conviction, fine and/or a suspension or revocation of your tidal fish license by a Court or the Department of Natural Resources.

Current temporary closures can be viewed by clicking on the word "CATEGORY" next to SHELLFISH (OYSTERS AND CLAMS) at this link: https://dnr.maryland.gov/Fisheries/Pages/Pub_Notices.aspx.

Clicking on the closure name will open the full text of the official public notice in a pdf document and includes coordinates describing the area, any special conditions, and important dates.

All or part of these areas may be opened in the future in consultation with the respective County Oyster Committee. The opening of these areas and any additional closures will be announced via public notice and be available at: https://dnr.maryland.gov/Fisheries/Pages/Pub_Notices.aspx.

Permitted Oyster Harvest Gears Online Map

A map showing the areas where legal oyster gears are permitted is available online for the use of oyster harvesters: <http://gisapps.dnr.state.md.us/GearLineMap/>. The Maryland oyster gear areas shown in this application are for guidance only. For the legal boundaries, please consult Maryland statute and the Annotated Code of Maryland (COMAR 08.02). In addition, near-shore areas (shallow waters up to approximately 200 feet from shore) may appear as approved on the map because of inadequate resolution. These waters may be unmonitored and therefore unclassified as well as unsuitable for harvesting. Interested persons should contact MDE to determine the classification of all near-shore waters. For any questions regarding the content of this map, please contact: Frank Marenghi at frank.marenghi@maryland.gov or 410-260-8302. To report any misplaced buoys, contact the Maryland Natural Resources Police 24-hour hotline at 800-635-6124.

Ordering Oyster Bar Charts and Accessing the DNR Facility at Matapeake

The Department of Natural Resources Hydrographic Operations Division can print oyster bar charts for a fee. Orders can be placed online by visiting: <https://www.shopdnr.com/naturaloysterbarchartsnob.aspx>. Due to the complexity of the information that can be displayed on the charts, it is strongly recommended that individuals contact Hydrographic Operations in advance of ordering. For example, if a commercial waterman needs to have both Patent Tong lines and Power Dredge lines on a chart along with the current MDE water quality information, be sure to ask for these things on your chart. The information printed on the chart, just as in this closure book, can only be considered current as of the date it is printed.

Increased security measures have been implemented at the DNR Matapeake Complex. Individuals wishing to come to Matapeake for charts or information will need to contact Ann Williams with Hydrographic Operations at 410-643-6521 in advance so that their name can be forwarded to the NRP Communication Center. Individuals who have been granted access for a particular day and time will need to call the number posted at the gate upon arrival: 410-260-8888. They will need to identify themselves, give their waterman ID number and state that they are there to meet with Ann Williams (or another staff member by name). Thank you for your cooperation.

SECTION 1

State of Maryland Shellfish Closure Area Maps

Commercial shellfish aquaculture leases are not depicted on the shellfish closure area maps contained in this book. The areas on the maps may contain private shellfish leases that are not open to the public fishery. It is a shellfish harvester's responsibility to be aware of the location of shellfish leases prior to harvesting. In an effort to assist commercial licensees with knowing the location of shellfish aquaculture leases prior to harvesting, the Department has created an online tool. You can access the online tool here:
http://dnr.maryland.gov/fisheries/Pages/aquaculture/information_portal.aspx

If you have questions about the location or status of a shellfish aquaculture lease or to request a print version of lease coordinates, please contact the Aquaculture and Industry Enhancement Division at (410) 260-8648.

Detailed Descriptions of The Maryland Department of the Environment's Shellfish Growing Water Classifications As of June 1, 2022

Detailed Descriptions of MDE’s Shellfish Growing Water Classifications as of June 1, 2022

WATERS LYING ADJACENT TO MARINA FACILITIES

The following areas are classified as restricted:

All of the waters lying within the confines of any marina are restricted for the harvesting or storing of shellfish. Also, all waters lying adjacent to marina facilities located in shellfish waters of the State and capable of accommodating eleven (11) or more vessels are restricted for the harvesting or storing of shellfish between May 1st and September 30th of each year. These restrictions will include that area beyond a marina facility based on the following table:

| <u>Number of Slips</u> | <u>Distance of Restriction Beyond Marina</u> |
|------------------------|--|
| 11 - 50 | 100 feet |
| 51 - 100 | 150 feet |
| greater than 100 | 200 feet |

These areas will be reopened to shellfish harvesting each year between October 1st and April 30th. Any individual owning a marina facility may request a variance for the size of the zone described above in accordance with the marina policy adopted by the Department on August 10, 1987. Anyone desiring additional information concerning this policy may call MDE, Water and Science Administration at (410) 537-3818.

These restricted areas are established as part of Maryland's participation in the National Shellfish Sanitation Program. Under this program, these areas, while not necessarily containing polluted water or shellstock, are restricted as a precautionary measure to assure that only safe, marketable shellstock will be harvested.

WATERS LYING ADJACENT TO WASTEWATER TREATMENT PLANT OUTFALLS

The following areas are considered Closed Safety Zones/prohibited areas:

Areas adjacent to sewage treatment outfalls are classified as prohibited as required under the National Shellfish Sanitation Program. Prohibited means that the harvest of shellstock for any purpose is not permitted. These areas are included in the descriptions that follow and are noted as "Closed Safety Zone/ prohibited". The enforcement of these closed areas is same whether the area is classified as restricted or prohibited and the map associated with the descriptions will show these areas with a cross hatch symbol.
