Urieville Lake Reopening

Fishing and Boating Services is pleased to announce that Urieville Lake Fisheries Management Area has been reopened for public use. Approximately 450 cubic yards of material has been dredged from the area around the boat ramp providing easier access for small boats and improving shoreline access for anglers. A small dock has been installed to assist in boat launching and retrieval, as well as improve fishing access. The improvement in bottom substrate will provide enhanced spawning habitat for nesting fish like largemouth bass and bluegill sunfish. The project was funded by the State Lakes Protection and Restoration Fund.

Fishing and Boating Services requests that visitors do their best to avoid disturbing the recently planted areas which are covered with straw or matting. Please email Brett.Coakley@Maryland.gov or call the Eastern Regional Freshwater Fisheries office 410-928-3643 extension 104 if you have any questions or concerns.
