The Forest Stewardship Council® (FSC) is an independent, not for profit, non-government organization established to promote environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

FSC's vision is that the world's forests meet the social, ecological, and economic rights and needs of the present generation without compromising those of future generations.

## **A Objective**

This addendum lists chemical pesticides that meet the indicators and thresholds set out in Annex 1 of FSC-POL-30-001 V3-0 FSC Pesticides Policy, and therefore are considered to be highly hazardous in the FSC system and classifies them as prohibited, highly restricted or restricted.

## **B Scope**

This addendum is mandatory for FSC certificate holders (and applicants for certification) and FSC-accredited certification bodies.

## Background

FSC takes into account the toxic characteristics for humans and the environment of chemical pesticides, and identifies highly hazardous pesticides using internationally recognized hazard groups and criteria, and the associated indicators and thresholds listed in Annex 1 of the FSC Pesticides Policy.

The hazard groups and criteria are identified by colours in Annex 1 of the Policy:

Hazard group	Number	Criteria
Relevant International Agreements or conventions	1	Relevant International Agreements or conventions
Acute toxicity	2	Acute toxicity to mammals and birds
Chronic toxicity	3	Carcinogenicity
	4	Mutagenicity to mammals
	5	Developmental and reproductive toxicity
	6	Endocrine disrupting chemical (EDC)
Environmental toxicity	7	Acute toxicity to aquatic organisms
	8	Persistence in soil or water and low sorption potential and bio-magnification and bio-accumulation
Dioxins	9	Dioxins (residues or emissions)
Heavy metals	10	Heavy metals

To support Organizations to reduce and phase out the use of chemical pesticides following a stepwise approach, FSC has prioritized the hazard groups and the criteria to identify highly hazardous pesticides (HHPs) and categorized HHPs as follows:

- a) FSC prohibited HHPs.
- b) FSC highly restricted HHPs.
- c) FSC restricted HHPs.

## Part I – Lists of FSC highly hazardous pesticides

### Prohibited list

The FSC list of prohibited HHP includes chemical pesticides:

- are listed or recommended for listing under Annex A (elimination) of the Stockholm Convention on Persistent Organic Pollutants or Annex III of the Rotterdam Convention on the Prior Informed Consent Procedure or listed under the Montreal Protocol on Substances that Deplete the Ozone Layer; or,
- are acutely toxic and can induce cancer (carcinogenic and likely to be carcinogenic); or,
- contain dioxins; or,
- contain heavy metals.

Note: The colored criteria and indicators are considered to classify HHP as FSC prohibited pesticides.

The pesticide active ingredients in groups and their CAS number at listed in the last section of this document.

## Highly restricted list

The FSC list of highly restricted HHP includes any chemical pesticide belonging to 2 or 3 out of 3 hazard groups. This means that the active ingredients that are included in this list present:

- Acute toxicity AND chronic toxicity AND environmental toxicity, OR
- Acute toxicity AND chronic toxicity, OR
- Acute toxicity AND environmental toxicity, OR
- Chronic toxicity AND environmental toxicity

Note: The colored criteria and indicators are considered to classify HHPs as highly restricted.

## Restricted list

The FSC list of restricted HHP includes any chemical pesticide belonging to 1 out of 3 hazard groups. It means that in this list are included active ingredients that present:

- Acute toxicity OR chronic toxicity OR environmental toxicity

Note: The colored criteria and indicators are used to classify HHPs as restricted.

The pesticide active ingredients in groups and their CAS number at listed in the last section of this document.
